# Validation and inspection of electric car charging stations

**Recharging stations:  
a new way to use electric energy.**

**MACROEVTEST** and **COMBI521EV**, HT'S new instruments for validation and inspection of electric car charging stations (EVSE) in compliance with standards IEC/EN 61851-1 and IEC/EN60364-7-722, and for safety tests in private and industrial environments. Thanks to the brand new **HTAnalysis App**, free to download for iOS and Android systems, **MACROEVTEST** and **COMBI521EV** are capable of transferring measured and recorded data onto tablets and smartphones, thus giving the operator the possibility to customize and share through HTCloud the result of their tests.
