For daily application in photovoltaic systems

Energy needs to be controlled.

By HT.

Solar energy production plants represent a crucial step towards a **virtuous** and **sustainable** future.

A future that is constantly evolving and needs to be cared for, controlled, managed, and guaranteed in an accurate and professional manner.

For these purposes, **HT Italia** provides you with optimal and **efficient instruments** for overseeing and **maintaining photovoltaic plants**. This includes **monitoring efficiency** and conducting quality **analyses**, all accessible via **Wi-Fi** directly on your devices.

Energy needs to be monitored, and HT knows how to do it.

Localization of the faulty pole

ORDER CODE **HVOPVISO**

PV-ISOTEST

MULTIFUNCTION INSTRUMENT FOR COMMISSIONING, TESTING THE ELECTRIC SAFETY AND SEARCHING FOR FAULTS

- › Insulation measurement up to 1500VDC
- › Localization of the faulty module through the new GFL function
- › Insulation measuring modes DUAL and TIMER for checking the state of deterioration of the insulation
- › Continuity of protective conductors with 200mA

ORDER CODE **HV00PVCS**

PV-CHECKS

MULTIFUNCTION INSTRUMENT FOR COMMISSIONING TESTS AND PERFORMANCE VERIFICATION

- › Insulation measurement up to 1000VDC
- › Open-circuit voltage measurement up to 1000V DC
- › Short-circuit current measurement up to 15A at 1000VDC
- › Continuity of protective conductors with 200mA
- › Polarity
- › AUTO SEQUENCE
- › Performance logging of PV strings

PV-CHECKS-PRO

COMMISSIONING TESTER OF PV INSTALLATIONS UP TO 1500V / 40A

- › A single GO-key stroke to perform all commissioning tests
- › Seamless mode to test in sequence all strings of a combiner box by a single GO-key stroke
- › Testing of single and bi-facial modules (even high efficiency) up to 1500V / 40A
- › All commissioning tests (continuity, polarity, Voc, Isc, insulation) on live installations
- › GFL - Ground Fault Locator to detect the precise position of the lack of insulation

I-V CURVE TRACER FOR MAINTENANCE AND TROUBLESHOOTING OF PHOTOVOLTAIC SYSTEMS UP TO 1500V AND 40A

- › I-V curve tracing of modules and strings **up to 1500V** and **40A**
- › Measurement of front-side and rear-side solar radiation for mono- and **bi-facial** module testing, even high efficiency
- › Measurement of **open-circuit voltage** and **short-circuit current** V_{oc}/I_{sc}
- › Database of **PV module performance**
- › **BMS (Battery Management System)** to self-recharge the batteries while testing
- › **Automatic acquisition** of the **cell calibration** value (by using suitable cells)

SOLAR I-Ve

I-V CURVE TRACING OF PHOTOVOLTAIC MODULES AND STRINGS + EFFICIENCY OF THE PHOTOVOLTAIC SYSTEM

- › Measurement of inverter efficiency in single-string single-phase systems
- › I-V curve up to 1500V and 10A or up to 1000V and 15A
- › Power measurement of a module or a string
- › Open-circuit voltage (V_{oc}) up to 1500V
- › Short-circuit current (I_{sc}) up to 15A
- › Environmental and Cell temperature
- › No distance limit for environmental measurements through remote unit SOLAR-02
- › AUTOSTART to run the test automatically
- › WiFi connection to smartphones and tablets

Photovoltaic system inspection

Thanks to the thermographic inspection of photovoltaic systems, hot spots and loose connections can be easily detected.

Picture: hot spots shot with THT300.

PV panels encapsulation

During long-term outdoor exposure, once moisture penetrates a module, it can condense and increase corrosion rates, significantly reducing the performance of the module. High resolution infrared cameras easily spot encapsulant failures.

Picture: encapsulant failure shot with THT600.

Services d'EURO-INDEX

EURO-INDEX est un fabricant, importateur et distributeur de diverses marques A dans le domaine des instruments de test et de mesure. Nous fournissons également une large gamme de services pour optimiser l'utilisation de ces instruments dans vos activités. Ces services comprennent naturellement l'entretien, la réparation et l'étalonnage des instruments, mais nous proposons aussi une assistance sous forme de formation via notre EURO-INDEX Academy et la location d'instruments.

Centre de Service Agréé

EURO-INDEX est un Centre de Service Agréé pour toutes les marques représentées. Cela signifie que vos instruments sont pris en charge par des techniciens formés par le fabricant et disposant des outils et logiciels adéquats. Seules des pièces d'origine sont utilisées et la garantie de votre instrument, ainsi que les certifications (ATEX, EN50379, etc.) restent intactes.

Laboratoire de maintenance et de calibrage

Le laboratoire des Pays-Bas est accrédité RvA selon la norme EN-ISO/IEC 17025. Cette accréditation est valable pour différentes grandeurs, telles que spécifiées dans le champ d'application associé au numéro d'accréditation K105. Les certificats de calibrage RvA sont acceptés à l'international et équivalents à ceux de BELAC.

Service Mobile

Outre les laboratoires d'étalonnage fixes de Zaventem et de Capelle aan den IJssel, nous disposons également d'un laboratoire itinérant appelé "Service mobile". Nos services peuvent venir vers vous, en offrant une qualité équivalente.

MQS®

MQS® est une formule d'entretien exclusive comportant un entretien et un calibrage périodiques de vos instruments de mesure à un coût fixe et faible. Via un portail Web gratuit (monmq.be), vous avez toujours accès à vos certificats de calibrage.

Location d'instruments de mesure

- Vaste assortiment
- Précision démontrable par le certificat d'étalonnage actuel
- Conseils avisés
- Les instruments sont livrés avec leurs accessoires

EURO-INDEX Academy

- Formations et séminaires
- Vidéos de démonstration et d'instruction
- Notes d'application
