  - Large, clear LCD back lit display for easy viewing of results
  - Easy to use graphical icon menu
- GasCheck Tesla is a highly sensitive helium leak detector designed for effective use within high magnetic fields found around the outside of Magnetic Resonance Imaging (MRI) scanners. The instrument's advanced micro thermal conductivity sensor provides rapid, accurate measurement of helium leaks down to ultra-low levels.

The instrument can be used on an MRI scanner whilst in operation, meaning interruptions to the machinery are avoided. Helium leaks are found quickly reducing cost, wastage and downtime of the machinery.

GasCheck Tesla provides a highly effective, low cost, easy to use alternative to expensive and cumbersome mass spectrometers. As well as being costly, mass spectrometers must be located outside the magnetic field and use long leak testing probes.

GasCheck Tesla provides stable, repeatable readings. The instrument's LCD display, LED indicator and audible sounder clearly indicate the helium leaks present. GasCheck Tesla automatically zeros to the ambient air around it when switched on, and is ready to detect immediately. The instrument's easy to use graphical interface and intuitive keypad allows simple function, selection and adjustment.

Handheld and portable, GasCheck Tesla provides simple one handed operation. The probe is designed to get into the smallest of places

and is typically moved along a joint or weld seam a few centimetres per second, enabling fast detection of all possible leak paths.

GasCheck Tesla is an advancement of the existing GasCheck G leak detector. GasCheck G is capable of detecting almost any gas or gas mixture, and is particularly sensitive to ammonia, argon, butane, helium, hydrogen and SF<sub>6</sub>.

GasCheck G is available in three distinct versions; G1, G2 and G3 with varied capabilities and can be upgraded quickly and easily without being returned to the factory.

Also available is the Intrinsically Safe GasCheck IS, the only ATEX approved leak detector for the detection of flammable gases.

### **Extend your instrument warranty**
